CH

John,

Thanks for the information and the opportunity. The Navigation District is very interested in providing information for the ship channel and proposed deepening project, as well as giving a presentation to the group if that option is available to us.

Please keep me in the loop as details become available.

Clayton Henderson

Assistant General Manager

Subject: Panama Canal Working Group

Sent on behalf of

John Durkay

Legal Counsel

Southeast Texas Plant Managers Forum

A Texas working group has formed to collect information from industry on issues related to the new Panama Canal including infrastructure development which might be needed to take advantage of the new canal. They propose a town meeting series. August 27th is scheduled for the ship channel and the 28th for Southeast Texas. We will provide you with more details as scheduled but this is an excellent opportunity for those of you who wish to make a presentation to do so and I suspect that is best done as an association rather than one by one. If you wish to volunteer to present to the group your concerns

rather than one by one. If you wish to volunteer to present to the group your concerns about how Texas can best take advantage of this change and what infrastructure improvements would best take advantage, let me know and we will start to organize a Forum effort. Some explanatory materials are attached. Our good EHCMA friends are helping to ride point on this project. The goal is to pre-educate the 2013 biennium session of the Texas legislature.
