## Our Members

Annual membership with Western Energy Alliance is an investment in the future of the independent oil and gas community in the West. Our 400+ member companies throughout the U.S. and Canada share and support our commitment to improve business conditions, expand opportunities and move the industry forward.

Membership dollars fund critical advocacy programs that promote demand for oil and natural gas as well as protect supply at regional and federal levels. In addition to supporting ongoing advocacy efforts, membership enables companies to

actively participate in the process during events such as the annual Washington, D.C. Call-Up, annual meeting, and other regional opportunities to directly work with and influence decision makers in government.

Participating in the Alliance and attending events help share the positive message of the oil and natural gas industry and educate the public as well as our members on current events, issues and strategies that impact our business and daily lives. Join the Alliance today to help create a stronger industry community.
